

WINDHAVEN PEDIATRICS
6300 WEST PARKER RD #324
PLANO, TX 75093

Thank you for choosing Windhaven Pediatrics for your child's Well care.

We believe that preventative medicine is the foundation of excellent healthcare and it's our mission to provide the most comprehensive care available. Our goals are to be thorough and informative to serve your needs.

Many insurance plans will cover preventative visits with no copay or deductible. These insurance plans require that we use specific "preventative" codes when we submit charges for your preventative services. These codes are different from the "medical" codes we normally use for diagnostic and medication management visits (otherwise known as sick visits).

Many lab tests and procedures necessary for disease management are not covered by insurance during preventative visits.

Windhaven Pediatrics is committed to delivering the most complete care possible, and we never forget that our primary responsibility is to serve you, not the insurance company. We want to empower you in making healthcare choices beyond insurance plan limitations.

During your well visit, if you have medical problems to discuss, symptoms that may require treatment, or if you need to follow up care, we will make every effort to accommodate you. Most patients find it is more efficient to address those concerns during their well exam. **An additional visit code is required for that service.**

These services will usually require a copayment or may apply to your deductible.

Some of our patients choose to address their medical problems at a separate office visit to focus on those concerns. We will be pleased to schedule another office visit for you if that is your request.

Thanks again for choosing Windhaven Pediatrics!
